Experience

Feb 2025 – Present

UX/UI Designer – Dev and Deliver

Worked on the design of AI tools for creating and chatting with custom characters. Designed the character creation flow, conversation view, and systems for traits, appearance, knowledge, and behavior tuning. Focused on making complex AI features simple and usable, so users can go from a short idea to a working character in seconds and refine it over time.

Apr 2023 – Jan 2025

Low-Code Developer / Web Designer – Make It Better RPA

Built and shipped low-code business apps for the construction and accounting sectors, used daily in real production environments. Created internal tools aligned with company needs. Designed and customized WordPress websites focused on business goals.

Nov 2021 – Apr 2023

UI/UX Designer – Slabstone

Designed a measurement and cost estimation tool for stonemasonry plants, taking it from concept to a market-ready system. Turned complex, industry-specific logic into clear and usable flows. The product supports the full workflow of stonemasonry businesses, from pricing and production to inventory and order management.

Education

Sep 2022 – Jul 2025

Information Management – Jagiellonian University in Krakow

Skills

Figma, Miro, WordPress, Lovable, Framer, basic HTML/CSS. Information Architecture, User Flows, Wireframing, Prototyping, Responsive Web and App Design, UX for AI Products, Product Thinking. Jira and daily collaboration with developers, product teams and stakeholders.

More about me

I'm a curious tech enthusiast who's been exploring computers and digital tools for most of my life. I adapt quickly, enjoy learning new things, and stay up to date with changes in design, tools, and emerging trends. I work well in team environments and approach my work with focus and attention to detail. Outside of work, I'm into football, music and books.
